

“Combined Cycle 101” Presented by Evans Hydro

Alex Manchenkov, senior engineer and operations manager at Evans Hydro, has agreed to take part in the ASME Combined Cycle Committee Pre-conference workshop entitled “Combined Cycle 101”, which will take place at the 20th International Conference on Nuclear Engineering and is collocated with the ASME Power Conference in Anaheim, California. The 8-hour course offered to end users occurs July 30th through August 3rd and the topic presented by Alex will emphasize the critical pumps found in combined cycle plants, including boiler feed, vertical circulator, condensate, and raw-water pumps. For more information, please contact Angie Vruno at 562-618-7719 or send an email through the Evans Hydro contact form.
