

Hydro's Nationwide Locations are Authorized Service Centers for WILO Pumps

Hydro is an authorized warranty, service and sales center for the WILO line of submersible pumps and mixers (formerly EMU, Davis EMU). In the municipal market, WILO pumps and mixers are used in sewage collection, sewage treatment, storm water, and dewatering.

Hydro knows how important service is to your pumping equipment decisions. Quality and reliability in submersible pump repair requires specialized training in both pumps and motors. For these reasons, Hydro has developed dedicated repair facilities, repair processes and standards specifically for submersible pumps.

With our many years experience in the design, manufacturing and servicing of submersible equipment, Hydro has the engineering knowledge, technology and know-how to service all of your submersible pump needs.
