

Podcast: Solutions Spotlight with Ares Panagoulas

Ever wondered how to better understand equipment health but struggled with climbing the mountain of data available to come up with actionable information? 

Listen to the latest podcast from [Chemical Processing](#) magazine, where our Director of Condition Monitoring and the Test Lab, Ares Panagoulas, talks about how to avoid data overload while still becoming more predictive in your asset management strategies.

Listen to the podcast below, or read the interview [here](#).

[Learn more](#) about the Centaur condition monitoring solution and read some [case studies](#) of successful implementations of condition monitoring.
