

Pumps & Systems 10 to Watch: John Roberts

Congratulations to Hydro's John Roberts for being chosen as one of Pumps & Systems Magazine's 10 to Watch for 2025! John is Senior Engineer in Hydro's Global Engineering division, where he works with customers across the world to create solutions for their pump challenges.

When asked what led him to specialize in aftermarket engineering, John said, "What really draws me to the aftermarket side is the variety. No two projects are ever the same. You're constantly adapting designs or methods to suit each situation, and that creativity keeps the work fresh and rewarding."

Read more about John's journey in the pump industry in the [Pumps & Systems feature](#).

Engineering Pumps for
Better Performance and Longer Life
