"I designed/built the slope by myself (and the grace of God) w/the three retaining walls. Afterwards I laid down the 320 blocks at 65 lbs each to stabilize the slope and provide the grid for the plants. As for the gazebo/ramada it is a pre-cut/drilled kit which I set and mounted in place, except for the roof panels, which can only be done w/four people. We did the latter, last 10/28 in a couple of hours. The following week-end I added the flood lights for the slope and light and fan for the gazebo." - Alex Vago | Hydro Evans
