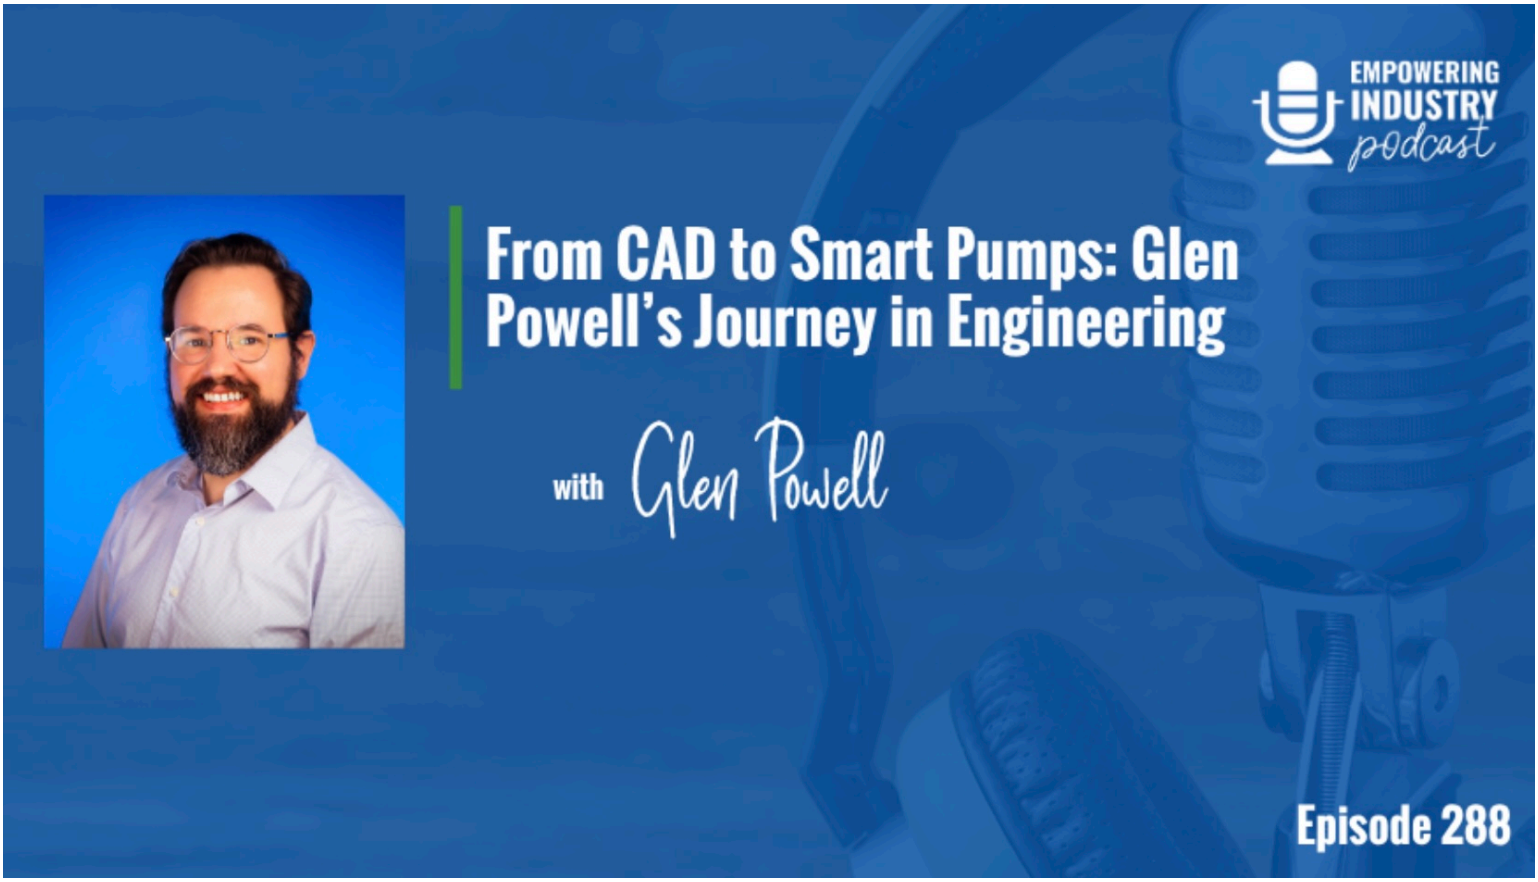
Podcast- From CAD to Smart Pumps: Glen Powell's Journey in Engineering



Hydro's Glen Powell joined Empowering Industry's Charli Matthews Carruth about his career at Hydro, spanning reliability engineering, pump testing, condition monitoring and global engineering.

Throughout the conversation, Glen discusses how wireless condition monitoring is changing equipment reliability, how Hydro's test lab is being used to evaluate smart pump technologies and energy efficiency, and why transferring industry knowledge to the next generation is so important. He also shares advice for engineers entering the industry, including the value of curiosity, ambition, relationships and integrity.
