Podcast: Solutions Spotlight with Ares Panagoulias

Ever wondered how to better understand equipment health but struggled with climbing the mountain of data available to come up with actionable information?

Listen to the latest podcast from Chemical Processing magazine, where our Director of Condition Monitoring and the Test Lab, Ares Panagoulias, talks about how to avoid data overload while still becoming more predictive in your asset management strategies.

Listen to the podcast below, or read the interview here.

Learn more about the Centaur condition monitoring solution and read some case studies of successful implementations of condition monitoring.
